Press release

AE&E to design flue gas desulphurisation units for Chinese steelworks

Vienna, 30 November 2009 – AE&E — one of the leading international plant engineering and construction companies in the field of thermal power generation and environmental technology that forms part of the listed A-TEC Industries Group — has secured its first contract to design emission reduction equipment for a Chinese steelworks. In response to increasingly strict environmental regulation in China the JianLong Group, one of the leading companies in the country's metallurgical sector, intends to install AE&E Turbosorp® flue gas desulphurisation units at two 90-square-metre sintering plants built in 2002. The order from Fushun Xinfu Steel & Iron is further proof of AE&E's strong reputation in the fast growing Chinese market.

“This project is a major milestone in the history of AE&E Shanghai. It will be the first instance of the use of Turbosorp® technology at steel industry sinter plants, and should enable us to gain a strong foothold in the rapidly expanding Chinese market for desulphurisation equipment for such facilities,” said AE&E Group CEO Georg Gasteiger.

The Liaoning Wanhe Group is acting as the general contractor for the project, and will be responsible for procurement, fabrication and erection. AE&E Shanghai has been commissioned with the basic engineering design of the flue gas desulphurisation plants, and the detail engineering design of the turboreactors, instrumentation and control equipment.

AE&E Group

AE&E Group GmbH, headquartered in Vienna, Austria, is one of the leading international plant engineering and construction companies in the field of thermal power generation and environmental technology. The Group's product portfolio includes turnkey power plants, steam generators, flue gas cleaning systems, energy from waste plants, combined cycle power plants, boiler pressure parts, coal gasification components, valves and services ranging from engineering and modernisation to modification and plant operation. The group employs some 5,000 people in Vienna and Graz (Austria), Zurich (Switzerland), Cologne, Ratingen and Nuremberg (Germany), Brno (Czech Republic), Paris (France), Bilbao (Spain), Slavonski Brod (Croatia), Moscow (Russia), Norcross (USA), Shanghai and Nanjing (China), Chennai (India), Sao Paulo (Brazil) and Sydney (Australia). It is owned by A-TEC Industries AG.
